

Yewon Kim

CONTACT INFORMATION	Department of Management Information Systems 70 Hannam-ro, Daedeok-gu Daejeon, 34430, Republic of Korea	Tel: +82 10 8379 7041 yewon_050104@naver.com
RESEARCH INTERESTS	Data-driven service planning and business analytics Database design and modeling Deep learning applications (image and behavior analysis) Mixed reality and 3D scene reconstruction	
EDUCATION	Hannam University, Daejeon, Korea B.S. (candidate) in Management Information Systems, Expected Feb. 2028 • Double major in Big Data Applications, since March 2026 • GPA: 4.45 / 4.5	
RESEARCH EXPERIENCE	2026.7 – 2026.8	Visiting Undergraduate Researcher, Spatial Intelligence Research Section, Spatial Content Research Division, Spatial Media Research Laboratory, Electronics and Telecommunications Research Institute (ETRI), Daejeon, Korea
HONOURS AND AWARDS	Grand Prize in Social Contribution Idea Competition, Korea Airports Corporation, 2026 - Proposed converting idle airport spaces into local pop-up stores, youth startup booths, and art performance venues Excellence Prize in Service Discovery Competition, Ministry of Land, Infrastructure and Transport, 2026 - Planned MoveValue, a personalized property matching and recommendation service with a model weighted by furniture type Encouragement Prize in ERP Student Idea Competition, Korea Society of Management Information Systems, 2026 - Presented at the 2025 Spring Conference; proposed a security application detecting abnormal behavior in real time during remote meetings using AI pose estimation Gold Prize in Yuseong-gu Citizen Idea Competition, <i>organization</i> , 2026 - Planned a personalized tourist course recommendation service based on Tashu, the public bicycle system of Daejeon Encouragement Prize in Yeongju City Proposal Competition, <i>organization</i> , 2026 - Proposed a community-oriented service improvement plan utilizing local resources Grand Prize in Living Lab Project, Hannam University and Daejeon Job and Economy Promotion Agency, 2026 - Four-month field marketing project for a local bakery, proposing consumer-oriented solutions and producing branded goods Encouragement Prize in Creative Idea Competition, Hannam University and Campus Innovation Park, 2026	

- Proposed strategies for student talent development, recruitment, and business initiatives within the Campus Innovation Park

First Prize in My AI Idea Competition, Hannam University, 2026

- Designed a beacon-based campus facility issue reporting and management module with 3D digital twin monitoring

Top Excellence Prize in Social Impact Long-term Project, Hannam University, 2026

- Planned a mobile application recommending courses built on the stories of local merchants in Daeheung-dong and Seonhwa-dong

Top Excellence Prize in CTL Presentation Competition, Hannam University, 2026

- University-wide presentation competition evaluating the structure and delivery of project outcomes

Excellence Prize in Academic Festival, Department of Management Information Systems, Hannam University, 2026

- Presented the design and implementation of the beacon-based campus facility issue reporting and management system

PROJECT EXPERIENCE

2026

Mixed reality pipeline for indoor space scanning and texture painting, Electronics and Telecommunications Research Institute

- Indoor scene reconstruction and object detection pipeline based on Meta Quest 3 scans
- Comparative experiments and optimization of 3D texture painting models
- Design and validation of floor plane removal logic for mesh quality improvement

2026

MoveValue, a personalized property matching and recommendation service, Service Discovery Competition, Ministry of Land, Infrastructure and Transport

- Design of a listing recommendation logic weighted by furniture type
- Market research on competing services and organization of presentation materials

2026

Mobile application recommending local merchant courses, Social Impact Long-term Project, Hannam University

- Service planning based on the stories of merchants in Daeheung-dong and Seonhwa-dong
- Proposal for balanced regional development to reduce the commercial gap in the old city center

	2026	University Innovation Support Program Monitoring Group, Hannam University	
		• Monitoring of departmental programs for one semester from a student perspective • Identification of inconveniences and proposal of improvement plans	
	2025	Campus System Monitoring Group, Hannam University	
		• Monitoring of campus information systems for one semester from a student perspective • Identification of usability issues and proposal of improvement plans	
CERTIFICATIONS	2026	Advanced Data Analytics Semi-Professional (ADsP), Korea Data Agency	
	2026	SQL Developer (SQLD), Korea Data Agency	
	2026	Distribution Manager, Level 2, Korea Chamber of Commerce and Industry	
	2026	AI Prompt Operation Test (AI-POT), Level 1, Korea Productivity Center	
LANGUAGE SKILLS	Korean	mother tongue	
	English	conversational	
COMPUTER SKILLS	Operating Sys.	Windows	
	Programming	Python, R	
	Databases	MySQL, Oracle
